Our doors are always open to current and new clients. If your business has been affected by the change in oil prices, we can help you by doing some of the following things:

- ◆ Assess ways to improve efficiencies
- ◆ Help you find ways to permanently fix your financing, whether by restructuring current financing, or looking at finding a new source of income.
- ◆ Review current deficiency
- ◆ Reconstruct a new business plan

No matter what type of business you have, whether it is oil and gas, retail, or transportation etc., communicating with Community Futures Lac La Biche is vital if you would like us to accommodate your needs and give you the financial assistance you require.

If a client does not communicate with us when they are in trouble, we will unfortunately be unaware of their current set backs and situation. With that being said, we will not be able to work with or help them, which may lead to bad credit and consequences in the future.

We are here to help!
